Introducing Our Hazardous Goods LCL Shipping Service to Los Angeles/Long Beach

NRS CORPORATION has launched a hazardous cargo LCL marine transport service from Yokohama to North America (Los Angeles/Long Beach) starting in February 2025.

This service is designed to meet the growing demand for semiconductor logistics in the U.S. and is the first in the industry to handle high-pressure gases in an LCL marine transport service. Utilizing our Yokohama Logistics Center (Tsurumi-ku, Yokohama, Kanagawa, Japan) as a CFS, we provide seamless door-to-door service, from domestic cargo acceptance to final delivery.

This new option is ideal for customers who previously had to arrange FCL shipments for small quantities or depend on air transport for hazardous cargo.

The NRS GROUP remains committed to enhancing its services to ensure safer and more efficient hazardous cargo logistics.
